

Assignment 5

Objective: Practice Inheritance

Requirements:

Based on Chapter 15 PowerPoint slides #7-21, create a new class named Manager. You can define the Manager class as derived class of Employee or SalariedEmployee.

Manager class has private member variables salary and bonus; the class has constructors, setter methods, getter methods, and printCheck() to print a manager object's salary and bonus.

You should have 4 header files, 4 implementation files and test(application) file. Please test all the methods of a Manager object.

Submission:

Submit all header files (.h), C++ source files (.cpp) and the screenshot of your program output on Moodle.
