

Lab 5

Objective: Practice **Arrays** and **Sorting Algorithm**.

In this lab, you are going to practice the two sorting algorithms by using Array in Section 7.3. Please use the code 7.12 and 7.13 as reference.

Please create a function for each of the algorithms, the function should have one parameter for an array and another parameter for the size of the array.

Submission:

You need to upload to Moodle: the source code (.cpp files), and the screenshot of the running of your program before 4pm Wednesday.
